

What is claimed is:

1. A hood latch assembling device for exactly positioning a hood latch assembly at a carrier, the hood latch assembling device comprising:

a carrier assembling stand for fixing the carrier; and

5 a hood latch guide jig for exactly positioning the hood latch assembly at a predetermined location of the carrier,

wherein the carrier assembling stand includes:

a vertical frame;

a horizontal frame;

10 horizontal fixing jigs for fixing and supporting the carrier on the vertical frame in the horizontal direction;

a vertical fixing jig for fixing and supporting the carrier on the horizontal frame in the vertical direction, and

15 wherein the hood latch guide jig is mounted at an end of the horizontal frame of the carrier assembling stand.

2. The hood latch assembling device according to claim 1, wherein the carrier assembling stand further includes a horizontal supporting device for preventing a horizontal movement of the carrier by supporting the rear surface of the carrier
20 during an assembling of the hood latch assembly to the carrier.

3. The hood latch assembling device according to claim 1, wherein the horizontal fixing jigs include: a horizontal position

adjusting pin to be inserted into horizontal position adjusting holes formed in the carrier for horizontally fixing the carrier; and a drive unit for moving the horizontal position adjusting pin.

4. The hood latch assembling device according to claim 1,
5 wherein the vertical fixing jig include: a vertical position adjusting pin to be inserted into a vertical position adjusting hole formed in the carrier for vertically fixing the carrier; and a drive unit for moving the vertical position adjusting pin.

5. The hood latch assembling device according to claim 1,
10 wherein the hood latch guide jig includes: a holding part for holding the hood latch assembly; and a drive part for moving the holding part.
